

Arena Stage Deck

The Arena Deck is the latest innovation by Total Fabrications to address the growing demand for quality modular staging in the professional market.

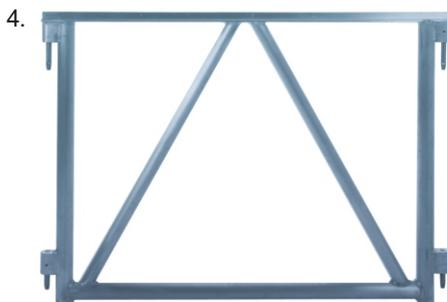

Designed primarily for major touring concerts, large indoor & outdoor venues, it also integrates with the Total Fabrications Outdoor Roof Tops to form a free standing package.

Specifications

Modular Staging units consist of four basic components:

- Low Profile Stage Deck
- Main Support Gate
- Node Post with adjustable screw jack
- Link Beam

Fast & easy assembly no tools required

Stacks into very small space for storage and transportation

All components are lightweight for easy handling

Standard 800kg/m stage load rating

Adjustable working height from 1.5m to 2m

Easy under space access due to "Link Beam" design

Designed to work in conjunction with the TFL Outdoor Roof Systems

Available in 4ft x 4ft, 5ft x 5ft and 1.5m x 1.5m modules as standard

We guarantee our products against defective materials and workmanship for as long as the customer owns the product (subject to correct use & annual warranty inspection). Other Terms & Conditions apply - contact TFL for further details.
