

R2 – ROBOTIC ARMS

Powerful, Impressive and Efficient

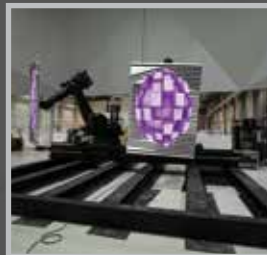

KR 240-2 ROBOTIC ARM SPECIFICATIONS

NUMBER OF CONTROL AXES	6
WEIGHT	1267 kg
RATED PAYLOAD	240 kg
MAXIMUM REACH	2.7 m
SOUND LEVEL	< 75 dB (A)
HEIGHT (WITHOUT BASE)	3.1 m
TRACK LENGTH	33m

R2 – Our heavy duty robotic arms achieve the perfect balance between payload and reach. They open up a vast range of potential applications. They are ideal for venues that can support a greater weight load.

These robots are versatile in their usage and with a payload of up to 250kgs they are able to work with video screens, lighting fixtures, projectors, stage props, etc., to create dynamic movement with great precision and ease.

Their size makes them very impressive especially when used at larger gatherings, events and on stages where they will create a most striking and dramatic appearance.
